**SUBJECT: Senate Bill 1022 Construction Financing  
Program; Proposal Details. Information only.**

**AGENDA ITEM: M**

**ACTION:**

**INFORMATION: X**

**RESOURCE PERSON: Gary Wion**

---

**Summary:**

The Board directed staff at the January 16, 2014 Board of State and Community Corrections meeting to provide a summary of the Senate Bill (SB) 1022 Construction Financing Program proposals approved for conditional award. This agenda item will provide an overview and summary of the 15 SB 1022 proposals recommended for conditional funding at the January 16, 2014 BSCC meeting.

**Background:**

SB 1022 provides \$500 million of lease revenue financing for the construction of local adult detention facilities. This legislation identifies the need to construct new local detention beds that emphasizes inmate treatment programs. Requesting counties could propose projects that only added beds, replaced antiquated beds, created program space, or contained a combination of program space and beds. An Executive Steering Committee identified the need to allow the small, medium, and large counties to compete for this funding against similar sized counties and developed three set aside pots of funding: \$100 million small, \$160 million medium, and \$240 million large. A cap on the amount that each county could request was established within each set aside: \$20 million for small counties, \$40 million for medium counties, and \$80 million for large counties.

A total of 15 county projects were recommended for funding by the ESC. Attachment A provides a summary of each proposal that was recommended for funding.
